IMPORTANT NOTES:

- Make sure that your printer is in optimum perfect condition (no clogged nozzles, paper and ink that you plan to use, etc.)
- Save your printer setting as a preset (in the print driver) to use exactly the same parameters for future prints.
- Print all pages with Color Management turned OFF
- Make sure to let the prints dry and do not touch (most ink-jets require at least 20 minutes)
- When measuring prints use a flat surface and proper white measurement backer, and try not to touch the colored areas
